

# Alfa Laval DuraCirc®

## Circumferential piston pump

Circumferential piston pumps (CCPs) have been used for decades in a range of hygienic applications. But the DuraCirc is something new. It's the first CCP that delivers the perfect balance of durable reliability, high efficiency and superior hygienic performance that's easy to service. In addition to a class-leading range of flow and pressure capabilities, DuraCirc also comes standard with globally recognized hygienic certification.

Alfa Laval is putting the future of pumping on the move. Join us today at [www.alfalaval.com/DuraCirc](http://www.alfalaval.com/DuraCirc)

### Supreme Performance

Engineered for durability, reliability and efficiency to extend the boundaries of your performance

- Design optimized for high volumetric efficiency
- Wide performance envelope for flow and pressure
- Robust durable design
- Optional DuraCirc Uni-Fit port

### Superior Hygiene

Safely meets industry hygienic demands, assuring the integrity of your processes and the quality of your products

- EHEDG and 3A certified
- Profiled defined compression elastomers
- All stainless steel construction
- Optimized seal location allows easy cleaning

### Simpler Service

Innovative design features make maintenance faster and easier, increasing uptime in your operations

- Truly front loading self-setting single seal
- Single extended life FDA lubricant
- Fully interchangeable spare parts
- Heavy duty long life bearings
